

GET INVOLVED!

Receive Training and Certification in Environmental Education Activities that are Interdisciplinary and Correlated to Nebraska State Education Content Standards

Nebraska Project Learning Tree (PLT) and Nebraska Project Water Education for Teachers (WET) are:

- International award winning environmental education programs.
- Use hands-on learning activities that are appropriate for PreK-12 teachers.
- Interdisciplinary lessons about the “whole” environment.
- Aligned with the new Nebraska State Education Content Standards.
- Easily integrated into busy classroom schedules.
- “Designed by educators for Educators.”

Workshop participants receive:

- Hands-on instruction by professional environmental educators
- PLT and/or WET Curriculum and Activity Guide(s)
- Alignments to state standards for PLT and Project WET
- Supplemental environmental education resource materials
- Great door prizes and refreshments
- Time to share teaching strategies with other educators
- Professional Growth Credits

How to get PLT and WET?

Project WET and PLT are available through three to twelve hour workshops. Project WET and PLT workshops are conducted by trained facilitators throughout the year at various sites in Nebraska. Interested school districts can request a Project WET and/or PLT workshop to be presented on-site as an in-service or professional development day. **Please inquire about workshop fees.**

For more information about the Nebraska Project WET and PLT programs, current workshop schedule, or to arrange for an in-service day for your school, please contact the Nebraska State Coordinator:
